

AminoQuelant[®] - Mg

MAGNESIUM WITH AMINO ACIDS

What is it? What is it for?

AminoQuelant[®]- Mg is a product based on magnesium (Mg) and Free L-α-amino acids and other bioactive compounds obtained through the exclusive Enzyneer[®] technology. The combined application of L-α-amino acids and magnesium helps to improve the assimilation of magnesium and allows a much more rapid and efficient distribution in new leaves and parts of the growing plant.

Benefits

- Corrects the magnesium content of alkaline-deficient and acids soils, exposed to heavy rains and high temperatures.
- It increases the production of chlorophyll and stimulates the photosynthesis of the plant, so that the plants will be more productive and healthy.
- Promotes the metabolism of carbon, nitrogen, phosphorus and other enzymatic reactions in the metabolism of the plant.

MOMENT OF APPLICATION

Apply a minimum of 2-3 times when the plants are young or fruit trees begin their activity, before flowering or, as soon as they manifest the first symptoms of magnesium deficiency.

DOSE AND APPLICATION

Foliar application: 2-4 ml/L o 2-4 L/ha.

Fertigation: 4-8 L/ha.

CROPS

AminoQuelant[®]- Mg is recommended in all those crops that may suffer magnesium deficiency, of which the most important are: vegetables, potatoes, citrus, fruit trees, vineyard, olive, tropical fruit, cereals, alfalfa, sunflower and corn.

GUARANTEED ANALYSIS

	(P/P)	(P/V)
Free L-α-amino acids (*)	6%	8.4%
Magnesium	10%	14.0%
Total N	8%	11.2%

(*) The formula contains each and every one of the biologically active free amino acids: ASP, SER, GLU, GLY, HIS, ARG, THR, ALA, PRO, CIS, TYR, VAL, MET, LYS, ILE, LEU, PHE, TRP.
